We welcome your comments below. What is something/are some things that the instructor does well, e.g., something you hope that the instructor will continue to do in the class in the future?: Daniel Kebede

- Well prepared lectures, always send emails to notify students about the due days and office hours. Very caring and nice instructor.
- The instructor is very relatable and understanding of his students. It is an enjoyable class.
- The instructor did a great job at creating a comprehensive course, despite the 4-week long semester limitations. I felt as though the way the course was set up allowed for a lot of material to be covered without it feeling too overwhelming. The assigned readings in the textbook as well as the corresponding powerpoint documents really helped me to learn the material. I personally learn significantly better from reading rather than lectures, but when I couldn't understand a topic from the readings alone, the lecture videos did a great job at explaining the topics. I felt as though we were given plenty of time to complete the assignments and the ability to drop one homework and one quiz made the shortened course feel a lot less stressful. Furthermore, Daniel did a great job at being available to me as a student. He offered a lot of office hours, and they were strategically scheduled so that we could join them no matter our schedule. One of the office hours was during Sunday night right before the weekly assignments were due, which I feel like was very strategic and showed that he cared about his students. On top of this, each time I emailed him, I got a very quick answer, which I greatly appreciated.
- Daniel is really welcoming and very open to questions and criticisms.
- I think the instructor is very patient and he replies email very quickly which makes my study easier and more efficient.
- I liked how the assignments reinforced what we learned in class.
- Daniel has been a very helpful instructor

Make a suggestion(s) for improving the course (a criticism alone is not helpful; tell your instructor how you would fix any problem): Daniel Kebede

- The resolution of lecture videos is a bit low sometimes, so as the audio quality.
- The lecture videos are some time not cohesive, so I wouldve appreciated more transition between different ideas.
- The only thing I would recommend is making the Brightspace page slightly more organized. For me, it would have been more clear to understand had the material been sorted by which week we were supposed to complete the materials for.
- If the syllabus could show due dates for MindTap assignments and Problem Sets that would help with my time management.
- I think providing a detailed solution to quiz and assignments will be helpful to me when reviewing the content.
- I would have liked to see a more definite structure to the course. For example, it's confusing to have several different formats for quizzes rather than there being a standard one.
